Dynamic, results-driven, and visionary **Cybersecurity Leader** with over **two decades** of global experience in **Cybersecurity, Application Security, DevSecOps, and Cloud Security**, seeking strategic roles such as **Cybersecurity Director, CTO, Penetration Tester, or Cybersecurity Consultant (Software Development Focus)**. Adept at architecting and leading enterprise-wide security programs that integrate **Secure SDLC, Zero Trust Architecture, and AI/ML-driven security solutions**. Proven expertise in **Threat Management, Red Teaming, Adversary Emulation, and Vulnerability Management** across AWS, Azure, and GCP. Passionate about driving digital transformation, building resilient systems, and advancing secure product development.

Professional Summary

- **Enterprise Security Architecture & Program Management:** Architected large-scale cybersecurity programs, embedding security-by-design within SDLC and DevSecOps pipelines, ensuring resilience, scalability, and compliance.
- **Red Team & Adversary Emulation:** Hands-on operator across the full attack lifecycle — OSINT, C2 infrastructure design, Active Directory exploitation (Kerberoasting, DCSync, Pass-the-Hash, delegation abuse), lateral movement, and stealthy exfiltration — with disciplined mapping to MITRE ATT&CK and post-engagement detection-gap reporting.
- **Multi-Cloud Detection Engineering:** Designed AWS / Azure / GCP detection-engineering programmes — SIEM architecture (ELK, Splunk), log ingestion (CloudTrail, Activity Logs, Cloud Audit), and 15+ incident-response playbooks for IAM abuse, Key-Vault secret theft, S3/GCS exfiltration, malicious Lambda, and cross-account trust attacks.
- **Application & Vulnerability Management:** Led comprehensive Application Security and Vulnerability Management initiatives, conducting penetration testing on critical systems and executing robust mitigation strategies.
- **Security Engineering & DevSecOps Implementation:** Designed and executed Zero Trust Architectures and automated CI/CD security controls, integrating SAST, DAST, IAST, and container security.
- **Cloud & Infrastructure Security Excellence:** Directed cloud security strategies across AWS, implementing infrastructure hardening, network segmentation, and compliance frameworks.
- **Leadership & Security Culture Development:** Managed and mentored cross-functional cybersecurity teams comprising Pentesters, DevSecOps Engineers, and GRC experts.

Certifications

Governance, Risk & Compliance (GRC)

Certified Information Systems Security Professional (CISSP)

Certified Information Security Manager (CISM)

Red Team / Advanced Offensive Security

Certified Red Team Analyst (CRTA) — Full-scope red teaming

Certified Red Team Infra Dev (CRT-ID) — Red-team infrastructure development

Certified AD Red Team Specialist (AD-RTS) — Active Directory attack specialization

Multi-Cloud Red Team Analyst (MCRTA) — Multi-cloud adversary emulation

Cloud Security

Certified Cloud Security Professional (CCSP)

AWS Architect Associate

Certified Kubernetes Security Specialist (CKS)

Offensive Security / Penetration Testing

Offensive Security Certified Professional (OSCP+) —

Hands-on penetration testing

Certified Ethical Hacker (CEH)

Certified Network Pentester (CNPen)

DevSecOps & Application Security

Certified DevSecOps Professional (CDP)

Project & Program Leadership

Project Management Professional (PMP)

PMI Agile Certified Practitioner (PMI-ACP)

Skills

Core Competencies: Cybersecurity & Risk Management; Defensive Security & Threat Management; Cloud Security & Architecture; DevSecOps / DevOps & CI/CD; Network Pentesting; Security & Vulnerability Management; Offensive Security & Penetration Testing; Security Engineering.

Technical: Adversary Emulation MITRE ATT&CK Active Directory Attacks Kerberoasting / DCSync
C2 Infrastructure Purple Teaming Detection Engineering Multi-Cloud IR AI / LLM Red Teaming
Cloud Security DevSecOps Pen Testing SIEM / XDR NIST / ISO 27001 AWS / Azure / GCP
Kubernetes Security AI / ML

Tooling (selected): Mimikatz, Rubeus, Impacket, CrackMapExec, BloodHound / SharpHound, PowerView, PowerSploit, Cobalt Strike, Sliver, Empire, Covenant, Burp Suite, Metasploit, Nmap, Nessus, ELK, Splunk, AWS GuardDuty / Detective / IAM Access Analyzer, Azure Sentinel, Sigma, MITRE ATT&CK Navigator.

Soft Skills: Leadership, Problem-solving, Communication, Team Building, Negotiation.

Work Experience

Dec 2023 — Present

Consultant

Independent Consultant for Startups

- Conducting **adversary-emulation engagements** modelled on FIN/APT TTPs across external perimeter and internal Active Directory environments — covering initial access, Kerberoasting, DCSync, Pass-the-Hash, unconstrained-delegation abuse, lateral movement (PSRemoting / WMI), and stealthy exfiltration; every action mapped to **MITRE ATT&CK**.
- Designing **multi-cloud (AWS / Azure / GCP) detection-engineering** programmes for startup SOCs — log architecture, SIEM rules (ELK / Splunk), and 15+ incident-response playbooks for IAM abuse, Key-Vault secret theft, S3/GCS exfiltration, Lambda backdoors, and cross-account trust attacks.
- **AI / LLM red teaming** — prompt injection, jailbreaks, model exfiltration, and abuse-of-functionality testing against agentic workflows and RAG pipelines.
- Driving the establishment and operationalization of a robust **security governance framework** aligned with NIST, ISO 27001, GDPR, HIPAA, and PCI-DSS — ensuring startups adopt secure-by-design principles from inception.
- Leading comprehensive **application, API, network and cloud security assessments**, including secure code reviews, red-teaming, and vulnerability exploitation, to deliver actionable remediation road-maps.
- Orchestrating **Secure SDLC** practices, embedding SAST, DAST, IAST, SCA, CI/CD security, IaC/CaC security, and container/Kubernetes security into startup DevOps pipelines.
- Championing **cloud-native security controls** and **Zero Trust architecture** on AWS and Azure, including IAM/PAM design.
- Commanding the establishment and operational readiness of **SOC capabilities** — incident response, SIEM & XDR orchestration, threat intelligence, blue-team / red-team coordination.
- Mentoring and cultivating a **DevSecOps culture** within startup teams to build a high-performing security-first organisation.

Red Team Lab Engagements (Self-Directed — CyberWarfare Labs)

Adversary Emulation — Enterprise AD Compromise (CRTA / AD-RTS / CRT-ID Capstones, 2025)

- End-to-end red-team operation against a simulated enterprise (DMZ + internal Active Directory); built attacker infrastructure: Kali C2, redirector tier, payload server, listener topology — modelled on real-world APT operator OPSEC.
- **External kill-chain:** OSINT → service enumeration → web/network exploitation → reverse / bind-shell foothold.
- **Internal kill-chain:** AD enumeration with PowerView / Invoke-UserHunter; **Kerberoasting**, credential dumping with **Mimikatz**, **Pass-the-Hash**, **DCSync** against krbtgt, **Unconstrained-Delegation** TGT theft; lateral movement via **PSRemoting** (WinRM) and **WMI**. Every action mapped to **MITRE ATT&CK**.

Multi-Cloud Detection Engineering (MCRTA / MCBTA Lab, 2025)

- Stood up **ELK SIEM** (Elasticsearch + Kibana + Filebeat) on hardened AWS EC2 — single pane of glass for tri-cloud logs; ingestion of **CloudTrail / CloudWatch / VPC Flow / S3 Access Logs** (AWS), **Activity / Audit / Sign-in / Unified Audit Logs** (Azure), **Cloud Audit / Data Access Logs** (GCP).

- Authored 15 cloud-attack investigation playbooks: S3 bucket deletion, IAM instance-profile abuse, malicious Lambda execution, cross-account trust planting, Azure LISTKEYS abuse, Key-Vault secret exfiltration, App-Registration credential tamper, GCS exfil, GCP service-account impersonation, SA-key creation abuse.
- **Purple-Team Validation:** re-ran selected CRTA TTPs against the MCBTA monitoring stack to validate detection coverage end-to-end — demonstrated full *attack* → *detect* → *respond* loop in a single owned environment.

Nov 2019 — Dec 2023

Associate Director

Evalueserve Pvt. Ltd. (Bangalore, Karnataka)

- Steered annual **budgets worth \$1.5–2M** across security, development, and operations teams, driving strategic resource optimization for tools, training, and infrastructure investments.
- Directed comprehensive **cybersecurity program delivery** for global clientele, providing thought leadership in **SOC, VAPT, and GRC** initiatives.
- Championed collaboration with Cybersecurity-by-Design and product development teams to embed secure design principles throughout the **SDLC**.
- Oversaw the complete lifecycle management of **Digital and SSL Certificates** for all enterprise web applications.
- Strengthened organizational resilience by managing **network and infrastructure security** across web-hosting environments.
- Collaborated with development and cryptography teams to integrate **advanced encryption mechanisms** for end-to-end secure data transmission, storage, and authentication.
- Partnered with Product Management to define and execute roadmaps, successfully **shipping 10+ products** balancing innovation, scalability, and security.
- Architected and governed end-to-end development of **digital platforms in the data analytics domain**.
- Pioneered the adoption of **agile methodologies**, cultivating empowered, collaborative teams.
- Spearheaded cross-functional teams across **Application Security, Data Engineering, Data Science, UI/UX, DevOps, and DevSecOps**.
- Owned **infrastructure and resource budgeting** for the product portfolio.

Jun 2017 — Oct 2019

Sr. Principal Architect — IIoT, Cloud Services

Microland Ltd. (Bangalore, Karnataka)

- Drove strategic collaboration with sales and pre-sales teams, leading to the successful closure of a **\$3M SOC/NOC enterprise contract** (notable customers: Entigres and Uptake).
- Architected and engineered next-generation **Industrial IoT (IIoT) applications** leveraging GE Predix, AWS, and Azure platforms — enabling end-to-end Edge-to-Cloud connectivity.
- Specialized in **PaaS-based IIoT ecosystems** using Predix, with deep integration of HTTP, MQTT, AMQP, EtherNET/IP, and Modbus RTU/TCP.
- Implemented **EdgeX Foundry** and integrated **AWS IoT, AWS Greengrass, and Azure IoT Hub**.
- Leveraged open-source cloud technologies (**OpenStack, Cloud Foundry / Huawei PaaS**) and virtualization (Linux Containers, cgroups, chroot, QEMU, KVM).
- Deployed **Docker, Kubernetes, Mesos, DC/OS** and streamlined CI/CD with **Jenkins** and **GIT**.
- Mentored cross-functional teams on microservices architecture, IoT platform upgrades, and end-to-end IIoT implementations.
- Developed advanced analytical applications using **Machine Learning / Deep Learning** for predictive maintenance.

Mar 2016 — Jun 2017

Technical Manager

Innominds Software Ltd. (Bangalore, Karnataka)

- Directed the **Offshore Development Center (ODC)** for Huawei's Cloud Technology initiatives in the **FusionStage PaaS** ecosystem.
- Architected and implemented a dedicated Data Center environment leveraging **OpenStack**.
- Engineered **Cloud Federation** architectures using **Apache Mesos and Marathon**.
- Optimized Kubernetes performance and orchestration for containerized environments.
- Streamlined DevOps practices using **Jenkins and GitLab**.

Jan 2014 — Sep 2015

Head of Product Development

Diduce Technology Pvt. Ltd. (Bangalore, Karnataka)

- Pioneered the establishment of the Software Development Centre in Bengaluru.
- Drove end-to-end automation of development and testing processes; championed Agile adoption.
- Directed product management activities — feature requirements, product backlog, roadmap.
- Led multi-disciplinary teams across desktop, web, Android, and browser plugin development.

Jan 2011 — Jan 2014

Project Manager

Aditi Technologies (Now Harman) (Bangalore, Karnataka)

- Spearheaded the “Diduce” project, including an advanced Outlook plugin and search-algorithm optimisation that secured additional client business.
- Directed and delivered multiple large-scale projects valued **\$3.5M–\$4M**.
- Led a high-performing team to deliver a complex iOS application within a 6-week timeline.

Jul 2004 — Jan 2011

Technical Lead & R&D Engineer

Global Edge & Hewlett Packard ISO (IPG R&D Hub) (Bangalore, Karnataka)

- Pioneered R&D for **touchscreen-based printer appliances**.
- Engineered and delivered large-scale embedded systems for **RPI printers**.
- Multiple awards and recognitions for technical excellence and R&D contributions.

Apr 2004 — Jul 2004

Sr. Software Engineer

LG Soft India Pvt. Ltd. (Bangalore, Karnataka)

Jun 2003 — Apr 2004

Software Engineer

Elsoft Technologies Pvt. Ltd. (Bangalore, Karnataka)

Education

Advanced Executive Program in Cyber Security — 2024

International Institute of Information Technology, Bangalore (IIITB)

B.E. in Electronics & Communication — 2000

Gogte Institute of Technology, Belgaum
